

SharePoint Center of Excellence (CoE) Setup

Business Scenario

Setting up SharePoint 2013 CoE

Client intends to setup SharePoint 2013 Center of Excellence (CoE) to derive value from their investment on SharePoint 2013 solution platform and approached AG Technologies for setting up SharePoint 2013 CoE using Best Practices.

Introduction

The Client

Client is India's fifth largest private sector Bank with a pan India presence across all 29 states and 7 Union Territories of India, headquartered in Mumbai. Client has adopted international best practices, the highest standards of service quality and operational excellence, and offers comprehensive banking and financial solutions to all its valued customers.

Client has been recognized amongst the Top and Fastest Growing Banks in various Indian Banking League Tables by prestigious media houses and Global Advisory Firms, and has received several national and international honors for our various Businesses including Corporate Investment Banking, Treasury, Transaction Banking, and Sustainable practices through Responsible Banking

The Solution

• SharePoint CoE Setup Includes

- Design and Documentation of SharePoint 2013 CoE Infrastructure Architecture
- Configuration of Development Farm and Workstations
- SharePoint UI Prototype Design & UI Package Implementation
- Configuration of UAT Farm
- Configuration of Production Farm
- SharePoint Governance Plan and ALM Documentation

Benefits

- Consolidation of SharePoint environments, finding and bringing all SharePoint environments under the management of IT departments, consolidating licensing and negotiating better CALs, providing centralized feature management and services, setting up development standard & frameworks, publishing asset inventory, providing multi-tenant & tiered base services, facilitating shared learning, offering subject matter expert advice and overall guidance
- Eliminating rogue SharePoint environments, creating operational controls & support procedures, establishing and governing information architecture, defining and implementing information protection and privacy policies, implementing service level agreements, defining supportable robust SharePoint platform, rationalizing older versions and platforms, documenting platform, installation & development
- Driving adoption through showcasing successes & evangelizing benefits and defining & implementing balanced governance model.
