

OS Migration for Cement Manufacturing Company

Industry

Cement Manufacturer

Client Profile

Leading regional producer of cement, and the biggest producer in Oman.

Solution

AG Technologies Migrated Operating System from AIX P Series 5.3 to Windows 2003 X64.

Solution Benefit

- ◆ Faster return on your investment
- ◆ Efficient, technically robust operation
- ◆ Optimized SAP infrastructure and operation

The Summary

Client has implemented SAP ECC 5.0 and approached AG Technologies for Migrating Operating System from AIX to Windows. This helped client to optimize their SAP infrastructure and operations.

The Client

Client is a leading regional producer of cement & the biggest producer in Oman. Annual production capacity runs at 3.0 Million tons produced in state-of-the-art facilities.

The Business Requirement

Client's requirement was to Migrate Operating System from AIX P Series 5.3 to Windows 2003 X64.

The Solution Benefit

- ◆ To design new architecture to enable growth and operational efficiency
- ◆ To enable client for tested backup and restore solutions, which can drive higher availability and disaster recovery
- ◆ To reorganize database(s), which helped to reduce space fragmentation, improve performance and data availability
- ◆ To automate testing procedures which were manual today.

Advantages

- ◆ Low Administration and Maintenance Cost
- ◆ Operating System is easy to Manage
- ◆ Upgraded oracle to latest version as oracle 9I and 10G is an extended support by SAP

Technology

SAP Landscape before Migration:

SAP Solution: SAP ECC 5.0 / BW 3.5

Operating System: AIX P Series 5.3

DB: Oracle 9.0.2.6

SAP Landscape after Migration

SAP Solution: SAP ECC 5.0 / BW 3.5

Operating System: Windows 2003 X64

DB: Oracle 11 G

The Solution Benefit

- ◆ Efficient, technically robust operation of the new operating system and database is achieved with minimum cost
- ◆ The migration project is accelerated to get a faster return on investment
- ◆ Optimized SAP infrastructure and operation
- ◆ Expensive system downtimes during the migration are minimized
- ◆ System resource usage is optimized to make the most of IT investment
